IMAP needs MAIL_IMAP_HOST, MAIL_IMAP_USERNAME and MAIL_IMAP_PASSWORD (an app password) in the server's .env file and PHP's imap extension. Passwords are never stored in the database. Automatic fetching: schedule php cli/mail-sync.php every 5 minutes (Windows Task Scheduler).

Sorting rules

One keyword or phrase per line, optionally with a weight from 1 to 10 (e.g. purchase order : 4). Words in the subject count double. An email goes to the category with the highest score; with no match it goes to the fallback category. Emails corrected by hand are never changed by the rules.
